

HOW TO PROVIDE IMAGES TO MODEL YOUR PIECE IN 3D. [View instruction video >](#)

1. Place your object where you are able to walk around it.
2. Make sure the object has light from all angles.
3. Take at least 60 images around the object from all angles.
4. Make sure not to move the object when taking the photos.
5. Take close up images of dark and detailed areas.
6. Upload the images to your own folder in [this Google Drive](#).
7. Name the folder the title of your piece with dimensions fx. [GlassVase_12x10x30cm]

Note: If your piece is already created in 3D please upload the 3D file with textures and ignore the steps above.
